PROFESSIONAL SUMMARY

Full-Stack Developer | Front end Developer | Software Developer passionate about creating intuitive web experiences. Experienced in building responsive React applications, conducting vulnerability assessments, and managing technical documentation. Proficient in Python, Java, and modern web technologies, with a strong focus on delivering scalable and accessible software solutions.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), HTML5, CSS3, SQL, Mongo DB

Frameworks & Libraries: React.js, Django, Bootstrap

Tools & Security: Kali Linux (Nmap, Hashcat, Zphisher), Git, GitHub, Power BI, VS Code

Spoken Languages: English (Professional), Tamil (Professional), Telugu (Working)

WORK EXPERIENCE

MCQ Evaluation using AI Software — Intern

Dec 22, 2025 – Jan 21, 2026

Resileo Labs LLP (Open Mentor Trust, Chennai Vidya Shakti Project) | Chennai, India

- Managed and maintained internal software systems to support day-to-day technical operations, ensuring data integrity and consistent system performance across all active tools.
- Authored structured and detailed technical documentation for internal systems and workflows, enabling effective communication and knowledge sharing across cross-functional development teams.
- Collaborated directly with senior staff and developers to identify, troubleshoot, and resolve UI issues and workflow bottlenecks, improving overall system reliability.

PROJECTS

Volunteer Registration System | MongoDB, Express.js, React.js, Node.js (MERN)

- Developed a full-stack Volunteer Registration System using MongoDB, Express.js, React.js and Node.js (MERN) to manage volunteer information efficiently through secure CRUD operations.
- Implemented JWT-based admin authentication, integrated MongoDB for data storage, and added CSV report generation to enable secure management and easy export of volunteer records.

Netflix Clone | React.js, REST API, JavaScript, CSS3, GitHub

- Built a fully responsive movie-streaming interface using React.js, integrating a real-time REST API for dynamic content rendering across multiple device sizes and screen resolutions.
- Developed efficient state management using React Hooks and implemented dynamic client-side routing to ensure seamless navigation and high performance across both mobile and desktop platforms.
- Optimized component rendering and API data handling to minimize load times and deliver a smooth, uninterrupted user experience aligned with modern web application standards.

Vulnerability Detection System | Kali Linux, Nmap, Hashcat, Zphisher

- Planned and executed comprehensive network security assessments using Kali Linux tools, including Nmap and Hashcat, to identify, analyze, and mitigate potential system-level threats.
- Documented vulnerability findings in a structured report, providing prioritized and actionable defense strategies to strengthen the overall security posture of assessed systems.
- Applied Python scripting to automate parts of the assessment workflow, improving the repeatability and accuracy of the security evaluation process.

EDUCATION

Bachelor of Computer Science

2023 – 2026

Swami Dayananda College of Arts & Science, India

HSC / SSLC

2020 – 2023

St. Anne's Matric. Hr. Sec. School, India
